Treatment of Objected-to Claims After Appeal

This notice sets out the policy of the U.S. Patent and Trademark Office (PTO) with respect to the treatment of dependent claims that are not subject to rejection in an application in which an appeal to the Board of Patent Appeals and Interferences (Board) has been filed. 37 C.F.R. 1.191.

37 C.F.R. 1.197(c) reads:

> Proceedings are considered terminated by the dismissal of an appeal or the failure to timely file an appeal to the court or a civil action (37 C.F.R. 1.304) except: (1) Where claims stand allowed in an application, or (2) where the nature of the decision requires further action by the examiner. In such cases, the date of termination of proceedings is the date on which the appeal is dismissed or the date on which the time for appeal to the court or review by civil action (37 C.F.R. 1.304) expires. If an appeal to the court or a civil action has been filed, proceedings are similarly considered terminated when the appeal or civil action is terminated.

1. When an Appeal Brief is not filed

Upon failure to file an appeal brief, applications containing both, allowed claims and claims subject to rejection will have the appeal dismissed. The rejected claims will be cancelled and the application will issue with the allowed claims only.

Applicants should note that dependent claims which have been objected to by the examiner as being *allowable* except for their dependence from rejected claims are not claims which *stand allowed*. Accordingly, applicants must take affirmative action to overcome the objection and make the objected-to claims *allowed* claims. This may be done by filing an amendment rewriting objected-to dependent claims into independent form prior to termination of proceedings under 37 C.F.R. 1.197(c).

Upon termination of proceedings, the PTO will hold an application abandoned for failure to take appropriate action if the application contains only rejected and/or objected-to claims.

2. After a Board or Court decision

The approach outlined in (1) above will also apply to applications following an affirmance by the Board or a court of law.

An exception to the approach outlined in (1) above exists when the Board or court affirms a rejection against an independent claim and reverses all rejections against a claim dependent thereon. This type of decision requires further action by the examiner; 37 C.F.R. 1.197(c). Accordingly, upon termination of the time for appeal, the examiner will proceed in one of two ways:

a. Convert the dependent claim into independent form by examiner's amendment, cancel all claims in which the rejection was affirmed, and issue the application; or,
b. Set a one-month time period in which applicant may rewrite the dependent claim in independent form. Extension of time requests to this time period under 37 C.F.R. 1.136(a) will not be permitted. Failure to take timely action will result in abandonment under 35 U.S.C. 133 unless allowed claims are present in the application. If allowed claims are present, the examiner will cancel all rejected and objected-to claims and issue the application with the allowed claims only.

JAMES E. DENNY,
Deputy Assistant Commissioner for Patents.

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to library, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions,* and provides technical staff assistance in their use to aid the public, in gaining effective access to information contained in patents. CASSIS (Classification And Search Support Information System), which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is advised to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.
